Fort Lauderdale, FL 33304

Dear Friends, Everywhere

We will soon announce an agreement with one of the world's top insurers, which will insure cryptocurrency protected by our unique and proprietary secure solutions and services, as we offer them to you and to the world's top exchanges.

Among those, one of the most exciting and interesting for me and all of you is our uniquely secure biometrics-based crypto-wallet that includes our ERC-20 RISEN (RSN) tokens inside. Imagine being able to acquire a crypto asset in a secure wallet which is insured against loss due to cyber-attack. This is in addition to the fact that our RSN token is biometrically locked and cannot be stolen by anyone, even if they know the private key of your crypto wallet. We proved this to the whole world this summer, when we published the private key of my crypto wallet with \$100M in our RSN tokens inside. **No one**, even after more than 325 attempts to steal the tokens, was able to and eventually hackers gave up. This kind of security we innovate at Hoyos Integrity, is what the crypto industry needs to prosper without any of us feeling terrorized any longer by the hacker threat which is never ending.

We believe that it is in the industry's best interest for us to come out of the gate with not just a highly secured crypto asset, but also a properly insured one. To that effect, we have decided to restructure our ICO to offer you the most secure and insured product in the global crypto industry coming to you in the 4th quarter of this year.

I know that many of you have been anxiously awaiting our ICO and have registered for it. I beseech your indulgence a little bit as my team and I work hard to make sure that you invest into a token that delivers peace of mind to you with asset protection and appreciation that has never been seen in this industry. In the process, we believe we will become a standard-bearer for this industry in securing and insuring crypto assets.

Meanwhile, I invite you to kindly visit our website ([www.hoyosintegrity.com](http://www.hoyosintegrity.com)) to explore and learn about what and how my team and I have innovated. It is with much hard work that we have forged into cyber weapons real unique proprietary technology, standards, and solutions today to defend you, to secure your identity, and keep your crypto investments where they belong: with you.

Kindest Regards

Hector T. Hoyos

Founder, Chairman, CEO, CTO
